The "Company" in this Management's Discussion and Analysis ("MD&A") refers to The Westaim Corporation ("Westaim") on a consolidated basis. This MD&A, which has been approved by the Board of Directors of Westaim, should be read in conjunction with the Company's unaudited interim consolidated financial statements including notes for the three and six months ended June 30, 2022 and 2021 as set out on pages 37 to 59 of this quarterly report. Financial data in this MD&A has been derived from the unaudited interim consolidated financial statements for the three and six months ended June 30, 2022 and 2021 and is intended to enable the reader to assess the Company's results of operations for the three and six months ended June 30, 2022 and financial condition as at June 30, 2022. The Company reports its interim consolidated financial statements using generally accepted accounting principles ("GAAP") and accounting policies consistent with International Financial Reporting Standards ("IFRS"). All currency amounts are in United States dollars ("US\$"), the functional and presentation currency of the Company, unless otherwise indicated. Canadian dollars are referenced as C\$. The following commentary is current as of August 10, 2022. Additional information relating to the Company is available on the System for Electronic Document Analysis and Retrieval ("SEDAR") at www.sedar.com. Certain comparative figures have been reclassified to conform to the presentation of the current year, and certain totals, subtotals and percentages may not reconcile due to rounding.

IFRS for Investment Entities

The Company qualifies as an investment entity under IFRS and uses fair value as the key measure to monitor and evaluate its primary investments. The Company reports its financial results in accordance with IFRS applicable to investment entities.

Functional and Presentation Currency

The US\$ is the functional and presentation currency of the Company. International Accounting Standard 21 "*The Effects of Changes in Foreign Exchange Rates*" describes functional currency as the currency of the primary economic environment in which an entity operates. A significant majority of the Company's revenues and costs are earned and incurred in US\$, respectively.

Non-GAAP Measures

The Company uses both IFRS and non-generally accepted accounting principles ("non-GAAP") measures to assess performance. The Company cautions readers about non-GAAP measures that do not have a standardized meaning under IFRS and are unlikely to be comparable to similar measures used by other companies. Management believes these measures allow for a more complete understanding of the underlying business. These measures are used to monitor the Company's results and should not be viewed as a substitute for those determined in accordance with IFRS. Reconciliations of such measures to the most comparable IFRS figures are contained in Section 15, *Non-GAAP Measures* of this MD&A.

Cautionary Statement Regarding the Valuation of Investments in Private Entities

In the absence of an active market for its investments in private entities, fair values for these investments are determined by management using the appropriate valuation methodologies after considering the history and nature of the business, operating results and financial conditions, outlook and prospects, general economic, industry and market conditions, capital market and transaction market conditions, contractual rights relating to the investment, public market comparables, net asset value, discounted cash flow analysis, comparable recent arm's length transactions, private market transaction multiples and, where applicable, other pertinent considerations. The process of valuing investments for which no active market exists is inevitably based on inherent uncertainties and the resulting values may differ from values that would have been used had an active market existed. The amounts at which the Company's investments in private entities could be disposed of may differ from the fair value assigned and the differences could be material.

(ii) Skyward Specialty Supplementary Financial Measures for the three and six months ended June 30, 2022 and 2021 and December 31, 2021

In 2020, Skyward Specialty closed a Loss Portfolio Transfer agreement ("LPT") that provides reinsurance protection of approximately \$127.4 above Skyward Specialty's net ceded loss and loss adjustment reserves, primarily related to 2017 and prior policy years, subject to co-participation required from Skyward Specialty above specific amounts.

The Company considers certain financial results of Skyward Specialty to be important measures for investors in assessing the Company's financial position and performance. In particular, premium volumes provide a measure of Skyward Specialty's growth; "Loss ratio excluding LPT" (calculated by dividing net loss and Loss Adjustment Expenses ("LAE") excluding the charge of the LPT and the adverse development on prior years' loss and LAE reserves subject to the LPT by net earned premiums), "Expense ratio" (calculated by dividing the sum of: net policy acquisition expenses, operating expenses excluding unusual net expense items, less commission and fee income, by net earned premiums), and "Combined ratio excluding LPT" (calculated by the sum of Loss ratio excluding LPT and Expense ratio) provide measures of Skyward Specialty's underwriting profitability; "Adjusted operating income (loss)" and "Net income (loss)" provide measures of Skyward Specialty's overall profitability; and "Stockholders' equity" and "Tangible stockholders' equity" (calculated as total stockholders' equity less goodwill and other intangible assets) are measures that are generally used by investors to determine the value of insurance companies. The following ratios are measures generally used by investors to compare profitability and insurance company value: "Annualized return on equity ("ROE")" is net income (loss) expressed on an annualized basis as a percentage of average beginning and ending total stockholders' equity during the period; "Annualized adjusted ROE" is adjusted operating income (loss) expressed on an annualized basis as a percentage of average beginning and ending total stockholders' equity during the period; and "Annualized adjusted return on tangible equity ("ROTE")" is adjusted operating income (loss) expressed on an annualized basis as a percentage of average beginning and ending tangible stockholders' equity during the period.

The gross written premiums were primarily impacted by rate increases and growth in the continuing business and was partially offset by a reduction in gross written premiums in discontinued business.

Net written premiums - Net written premiums were \$188.7 for the three months ended June 30, 2022 compared to \$142.6 for the three months ended June 30, 2021, an increase of 32.3% and \$324.1 for the six months ended June 30, 2022 compared to \$257.4 for the six months ended June 30, 2021, an increase of 25.9%. The net written premiums were impacted by the growth in gross written premiums as noted above and higher net premium retention.

Net earned premiums - Net earned premiums were \$146.1 for the three months ended June 30, 2022 compared to \$118.8 for the three months ended June 30, 2021, an increase of 22.9% and \$287.8 for the six months ended June 30, 2022 compared to \$236.0 for the six months ended June 30, 2021, an increase of 21.9%. The increase in net earned premiums was due to Skyward Specialty's net written premium changes over the past 24 months.

Losses and LAE excluding LPT - In the three months ended June 30, 2022 and 2021, Skyward Specialty's Loss ratio, excluding loss and LAE subject to the LPT was 62.8% and 66.6% respectively and in six months ended June 30, 2022 and 2021, Skyward Specialty's Loss ratio, excluding loss and LAE subject to the LPT was 63.2% and 67.8% respectively. The improvement in the Loss ratio is driven by changing the mix of business including continued run-off of discontinued business and rate increases over the past two years. The Loss ratio, excluding catastrophes and prior years' development for the three months ended June 30, 2022 was 62.8% compared to 66.6% for the three months ended June 30, 2021 and for the six months ended June 30, 2022 was 63.2% compared to 66.4% for the six months ended June 30, 2021.

¹ Adjusted to conform presentation of the current period

Adjusted operating income (net income excluding net realized gains, net unrealized (losses) gains on equity securities and unusual items; all amounts net of income tax) - Adjusted operating income was \$16.4 for the three months ended June 30, 2022 compared to \$9.7 for the three months ended June 30, 2021 and \$36.2 for the six months ended June 30, 2022 compared to \$17.6 for the six months ended June 30, 2021. The increase of \$6.7 and \$18.6 in the three and six months ended June 30, 2022 compared to 2021, respectively, was primarily the result of higher underwriting result of \$4.1 and \$8.5, respectively, and higher net investment income of \$2.8 and \$10.4, respectively. The combined ratio excluding LPT improved to 91.8% from 94.2% for the three months ended June 30, 2022 and 2021, respectively, and 91.9% from 94.6% for the six months ended June 30, 2022 and 2021, respectively.

Net income (all amounts net of income tax) - The operating result of Skyward Specialty was a net income of \$5.1 for the three months ended June 30, 2022 compared to \$12.1 for the three months ended June 30, 2021, and a net income of \$21.4 for the six months ended June 30, 2022 compared to \$27.0 for the six months ended June 30, 2021. The decrease of \$7.0 and \$5.6 in net income for the three and six months ended June 30, 2022 compared to 2021, respectively, was primarily attributable to the net unrealized losses on equity securities partially offset by the higher adjusted operating income noted above.

Stockholders' equity - Skyward Specialty stockholders' equity decreased to \$419.6 at June 30, 2022 from \$426.1 at December 31, 2021. The decrease of \$6.5 resulted from the other comprehensive loss of \$31.2 primarily relating to the unrealized after-tax net change in the carrying value of Skyward Specialty's fixed income securities, offset by net income for the period of \$21.4, a decrease in the stockholder notes receivables of \$2.2, and additional paid in capital of \$1.1.

Skyward Specialty continues to acquire additional key talent, executes on underwriting actions to optimize its product mix, maintains protection under an LPT agreement signed in 2020 that helps minimize the impact of prior years' claims development, effectively manages its investment portfolio to result in improved investment returns, and has an AM Best rating "A-" with a Stable Outlook. Skyward Specialty's objective is to build a top quartile property and casualty specialty insurer.

The Company is continuing to seek additional investment opportunities to create shareholder value through partnering with other aligned and experienced management teams to build profitable businesses that generate attractive returns to the Company's shareholders over the long term.

However, each of the Incentive Plan and the Option Plan provide that under no circumstances shall there be Common Shares issuable under such plan, together with all other security-based compensation arrangements of Westaim, which exceed 10% of the aggregate number of Common Shares outstanding. Related parties include key management personnel and directors, close family members of key management personnel and entities which are, directly or indirectly, controlled by, jointly controlled by or significantly influenced by key management personnel or their close family members. Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, and include executive officers and directors of the Company.

For further details, see Note 12, *Related Party Transactions* in the Notes to the Financial Statements.

10. CRITICAL ACCOUNTING ESTIMATES AND ASSUMPTIONS

Preparation of the financial statements in conformity with IFRS requires management to make estimates and assumptions, some of which relate to matters that are uncertain. As more information becomes known, these estimates and assumptions could change and thus have a material impact on the Company's financial condition and results of operations in the future. The Company has established detailed policies and control procedures that are intended to ensure that management's judgments and estimates are well controlled, independently reviewed and consistently applied from period to period. Management believes that its estimates for determining the valuation of the Company's assets and liabilities are appropriate.

Management used net asset value as the primary valuation technique in determining the fair value of the Company's investments in private entities at June 30, 2022. Management determined that this valuation technique produced the best indicator of the fair value of the investments in Skyward Specialty and the Arena FINCOs at June 30, 2022. The significant unobservable inputs used in the valuation of Skyward Specialty and the Arena FINCOs at June 30, 2022 were the equity of each of the entities at June 30, 2022 and the multiple applied. For a detailed description of the valuation of the Company's investments in private entities, see Note 4, *Investments* in the Notes to the Financial Statements. Due to the inherent uncertainty of valuation, management's estimated values may differ significantly from the values that would have been used had an active market for the investment existed, and the differences could be material.

Other key estimates include the Company's fair value of share-based compensation and unrecognized deferred tax assets. Details of these items are disclosed in Note 12 and Note 14, respectively, to the Company's audited annual consolidated financial statements for the years ended December 31, 2021 and 2020.

11. CRITICAL ACCOUNTING POLICIES AND RECENTLY ADOPTED AND PENDING ACCOUNTING PRONOUNCEMENTS

A description of the Company's accounting policies is disclosed in Note 2 to the audited annual consolidated financial statements for the years ended December 31, 2021 and 2020.

At June 30, 2022, there were no new pronouncements that impacted the Company.

The Company's quarterly financial results do not follow any special trends and are not generally subject to seasonal variation but are instead impacted by general market and economic conditions, regulatory risks and foreign exchange fluctuations. In addition, the value of the derivative warrant liability and share-based compensation are impacted by fluctuations in the trading price of the Company's shares, discount rates, and foreign exchange fluctuations.

13. RISKS

The Company is subject to a number of risks which could affect its business, prospects, financial condition, results of operations and cash flows, including risks relating to lack of significant revenues, regulatory risks, foreign exchange risks and risks relating to the businesses of Skyward Specialty, the Arena FINCOs and Arena Investors. ¹ Principal represents the total funding commitment of a loan which, if applicable, is inclusive of any unfunded portion of the commitment at the end of the reporting period. Where a loan is issued at a discount, the cost amount includes the accreted discount as of the end of the reporting period. A loan may also be acquired at a cost lower than the par value of the principal outstanding.

² Some investments bear interest at a rate that may be determined by reference to LIBOR or Prime which reset daily, monthly, quarterly, or semi-annually and may be subject to a floor. For each, the Company has provided the current contractual interest rate in effect at June 30, 2022. Interest rates listed are inclusive of PIK, where applicable. PIK is interest paid in kind through an increase in the principal amount of the loan. The internal rate of return for many investments is generally greater than or equal to the total coupon (additional yield resulting from original issue discounts and/or some form of profit sharing, e.g. warrants). In the event that the internal rate of return on the investment is less than the stated rate, the lower rate is noted.

³ Loan to value ("LTV") represents the value of the outstanding loan as a percentage of the estimated fair value of the underlying collateral as of June 30, 2022.

⁴ Investment is not a loan. Metric is not applicable.

⁵ Denotes subordinate position within the structure.

⁶ Interest not accrued on loans purchased as non-performing.

⁷ Investment represents a credit pool purchase with no stated interest rate.

⁸ Investment is a maturity default past its maturity date and has an uncertain holding period as of June 30, 2022.

⁹ Investment represents owned real estate. Metric is not available.

¹⁰ Investment represents an unsecured credit pool purchase with no stated interest rate.

¹¹ This investment represents a claim against proceeds subject to a litigation result whereby the FINCOs are not accruing interest.

¹² Investment with no stated coupon rate.

¹³ Investment is a preferred equity investment.

¹⁴ Investment is an equity interest in an operating company. Stated coupon and LTV are not applicable.

¹⁵ Investment is a warrant to purchase an equity interest in an operating company. Stated coupon and LTV are not applicable.

¹⁶ Investment is in maturity default where the Company and its partners acquired the borrower in bankruptcy. LTV is not applicable.

¹ Principal represents the total funding commitment of a loan which, if applicable, is inclusive of any unfunded portion of the commitment at the end of the reporting period. Where a loan is issued at a discount, the cost amount includes the accreted discount as of the end of the reporting period. A loan may also be acquired at a cost lower than the par value of the principal outstanding.

² Some investments bear interest at a rate that may be determined by reference to LIBOR or Prime which reset daily, monthly, quarterly, or semi-annually and may be subject to a floor. For each, the Company has provided the current contractual interest rate in effect at December 31, 2021. Interest rates listed are inclusive of PIK, where applicable. PIK is interest paid in kind through an increase in the principal amount of the loan. The internal rate of return for many investments is generally greater than or equal to the total coupon (additional yield resulting from original issue discounts and/or some form of profit sharing, e.g. warrants). In the event that the internal rate of return on the investment is less than the stated rate, the lower rate is noted.

³ LTV represents the value of the outstanding loan as a percentage of the estimated fair value of the underlying collateral as of December 31, 2021.

⁴ Investment is not a loan. Metric is not applicable.

⁵ Denotes subordinate position within the structure.

⁶ Interest not accrued on loans purchased as non-performing.

⁷ Investment represents a credit pool purchase with no stated interest rate.

⁸ Investment is a maturity default past its maturity date and has an uncertain holding period as of December 31, 2021.

⁹ Investment represents owned real estate. Metric is not available.

¹⁰ Investment represents an unsecured credit pool purchase with no stated interest rate.

¹¹ This investment represents a claim against proceeds subject to a litigation result whereby the FINCOs are not accruing interest.

¹² Investment with no stated coupon rate.

¹³ Investment is a preferred equity investment.

¹⁴ Investment is an equity interest in an operating company. Stated coupon and LTV are not applicable.

¹⁵ Investment is a warrant to purchase an equity interest in an operating company. Stated coupon and LTV are not applicable.

¹⁶ Investment is in maturity default where the Company and its partners acquired the borrower in bankruptcy. LTV is not applicable.

15. NON-GAAP MEASURES

(a) Book value per share

Book value per share is computed as book value divided by the adjusted number of Common Shares. The table below provides the reconciliation of the Company's shareholders' equity at the end of the period, determined on an IFRS basis, to book value, and the number of Common Shares outstanding at the end of the period to the adjusted number of Common Shares:

	June 30, 2022	December 31, 2021	June 30, 2021
Book value:			
Shareholders' equity per IFRS	\$ 347.1	\$ 347.7	\$ 340.5
Adjustments:			
RSU liability ¹	5.6	5.9	6.5
Derivative warrant liability ²	0.1	0.2	0.9
	<u>\$ 352.8</u>	<u>\$ 353.8</u>	<u>\$ 347.9</u>
Number of Common Shares:			
Number of Common Shares outstanding	141,386,718	142,686,718	143,186,718
Adjustments for assumed exercise of:			
Outstanding RSUs ¹	2,975,198	2,975,198	3,034,261
Adjusted number of Common Shares ³	<u>144,361,916</u>	<u>145,661,916</u>	<u>146,220,979</u>
Book value per share - in US\$	\$ 2.44	\$ 2.43	\$ 2.38
Book value per share - in C\$ ⁴	\$ 3.14	\$ 3.07	\$ 2.95
Westaim TSXV closing share price - in C\$	\$ 2.42	\$ 2.50	\$ 2.67

¹ See Note 11, *Share-based Compensation* in the Notes to the Financial Statements. Liability related to RSUs converted from C\$ to US\$ at period end exchange rates. RSUs are exercisable for Common Shares or cash at no cost to the holders. Adjustment made to reflect a reclassification of the RSU liability to shareholders' equity assuming all outstanding RSUs were exercised for Common Shares.

² See Note 8, *Derivative Warrant Liability* in the Notes to the Financial Statements. Derivative warrant liability converted from C\$ to US\$ at period end exchange rates. Adjustment made as the non-cash fair value change in the derivative warrant liability from period to period is not indicative of the change in the intrinsic value of the Company. Vested Warrants were not included in the adjusted number of Common Shares as none of them were in-the-money at June 30, 2022, December 31, 2021 and June 30, 2021.

³ See Note 11, *Share-based Compensation* in the Notes to the Financial Statements. No adjustments were made for options at June 30, 2022, December 31, 2021 and June 30, 2021 since they were not in-the-money. The exercise of in-the-money options would have resulted in an infusion of capital to the Company.

⁴ Book value per share converted from US\$ to C\$ at period end exchange rates. Period end exchange rates: 1.28710 at June 30, 2022, 1.26410 at December 31, 2021 and 1.24095 at June 30, 2021.

(b) Net returns on the Arena FINCOs investment portfolios

Net Return on the Arena FINCOs investment portfolios is the aggregate of investment income, net of gains (losses) on investments less interest expense, management, asset servicing and incentive fees, and other operating expenses of the Arena FINCOs divided by average carrying values for the Arena FINCOs, for the period.

(c) Adjusted (loss) profit and comprehensive (loss) income, and adjusted earnings (loss) per share – diluted, excluding unusual items

Adjusted (loss) profit and comprehensive (loss) income excluding unusual items is computed as the GAAP (loss) profit and comprehensive (loss) income less the net impact of unusual items. Management has presented "adjusted (loss) profit and comprehensive (loss) income excluding unusual items" and "adjusted earnings (loss) per share – diluted" to reflect the Company's share of the results of the regular operations of the Company's investments.

Adjusted earnings (loss) per share – diluted, excluding unusual items is computed as the adjusted (loss) profit and comprehensive (loss) income excluding unusual items on a diluted basis divided by the weighted average number of Common Shares outstanding on a diluted basis.

2 Summary of Significant Accounting Policies

The significant accounting policies used to prepare these consolidated financial statements are as follows:

(a) Basis of preparation

These interim consolidated financial statements are prepared in compliance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting".

The financial statements of entities controlled by Westaim which provide investment-related services are consolidated. These entities consist of its wholly owned subsidiaries, HIIG GP, AFCII and WCA. The financial results of these entities are included in the interim consolidated financial statements from the date that control commences until the date that control ceases. The Company controls an entity when the Company has power over the entity, is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Assessment of control is based on the substance of the relationship between the Company and the entity and includes consideration of both existing voting rights and, if applicable, potential voting rights that are currently exercisable or convertible. Intercompany balances and transactions are eliminated upon consolidation.

The Company meets the definition of an investment entity under IFRS 10 "Consolidated Financial Statements" ("IFRS 10") and measures its investments in relevant subsidiaries at fair value through profit or loss ("FVTPL"), instead of consolidating those subsidiaries in its interim consolidated financial statements. Entities accounted for at FVTPL consist of Skyward Specialty (including Westaim HIIG Limited Partnership (the "HIIG Partnership")), and the Arena FINCOs (as defined in note 4).

Investment in associates are accounted for using the equity method in accordance with IAS 28 "Investments in Associates and Joint Ventures" ("IAS 28") and consists of investments in corporations or limited partnerships where the Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over these policies. The Company's investment in associates consist of its investment in Arena Investors (as defined in note 4), and is reported under investments in the consolidated statements of financial position, with the Company's share of profit and comprehensive income of the associates reported under "Net results of investments" in the consolidated statements of (loss) profit and comprehensive (loss) income.

(b) Functional and presentation currency

The US\$ is the functional and presentation currency of the Company. IAS 21 "The Effects of Changes in Foreign Exchange Rates" describes functional currency as the currency of the primary economic environment in which an entity operates. A significant majority of the Company's revenues and costs are earned and incurred in US\$, respectively.

(c) Use of estimates

The preparation of financial statements requires management to make estimates that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates and changes in estimates are recorded in the reporting period in which they are determined. Key estimates include the fair value of investments in private entities, fair value of share-based compensation, fair value of derivative warrant liability, and unrecognized deferred tax assets and liabilities.

2 Summary of Significant Accounting Policies (continued)

(d) Judgments made by management

Key areas where management has made difficult, complex or subjective judgments in the process of applying the Company's accounting policies, often as a result of matters that are inherently uncertain, include determining that the Company meets the definition of an investment entity under IFRS 10, valuation techniques for fair value determination of investments in private entities, applying the equity method of accounting for associates and determining that the Company's functional currency is the US\$. For additional information on these judgments, see note 4 for investments in private entities and associates and note 2(b) for functional currency.

(e) Foreign currency translation

Transactions in foreign currencies, including Canadian dollars ("C\$"), are translated into US\$ at rates of exchange prevailing at the time of such transactions. Monetary assets and liabilities transacted in foreign currencies are translated into US\$ at rates of exchange at the end of the reporting period. Non-monetary items measured at fair value in a foreign currency are translated using exchange rates at the date when the fair value was measured. Any resulting foreign exchange gain or loss is included in the consolidated statements of (loss) profit and comprehensive (loss) income.

From time to time, the Company may enter into foreign exchange forward contracts to manage certain foreign currency exposures arising from foreign currency denominated transactions. The Company has not designated any foreign exchange forward contracts as accounting hedges. Any resulting foreign exchange gain or loss arising from the foreign exchange forward contracts is included in the consolidated statements of (loss) profit and comprehensive (loss) income.

(f) Revenue recognition

Interest income is recognized on an accrual basis and dividend income is recognized on the ex-dividend date. Advisory and management fees are recorded as fee income over time as these services are performed.

(g) Cash and cash equivalents

Cash and cash equivalents generally consist of cash on deposit and highly liquid short-term investments with original maturities of 90 days or less. At June 30, 2022, the Company's cash consisted of cash on deposit in both C\$ and US\$.

(h) Capital assets

The Company's capital assets are included in other assets and are reported at cost less accumulated depreciation. Depreciation is calculated based on the estimated useful life of the particular assets which is 3 to 10 years for furniture and equipment. Leasehold improvements are depreciated using the straight-line method over the lesser of the term of the lease or the estimated useful life of the assets. At the end of each reporting period, management reviews the carrying amounts of capital assets for any indication of impairment. An impairment loss is recognized for the amount by which the carrying amount of the asset exceeds its recoverable amount. The recoverable amount is the higher of fair value less cost to sell and value in use.

(i) Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys a right to control the use of an identified asset, the Company assesses whether, i) the contract involves an identified asset, which is physically distinct and cannot be substituted by the supplier, ii) the Company has the right to obtain substantially all of the economic benefits from the use of the identified asset during the period of use, and iii) the Company has the right to operate the identified asset or the Company designed the identified asset in a way that predetermines how and for what purpose the identified asset will be used.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made on or before the commencement date, plus any costs incurred to dismantle and remove the underlying asset or restore the underlying asset or the site on which it is located, less any lease incentives received.

The right of use asset is measured at cost less any accumulated depreciation and any accumulated impairment losses. Depreciation is measured using the straight-line method from the commencement date to the earlier of the end of the useful life of the right of use asset or the end of the lease term.

2 Summary of Significant Accounting Policies (continued)

The lease liability is initially measured at the present value of the future lease payments not paid at the commencement date and the lease payments are discounted using the interest rate implicit in the lease if the rate can be readily determined, or the lessee's incremental borrowing rate if the rate cannot be determined.

In accordance with IFRS 16 "Leases" ("IFRS 16"), the Company has elected not to recognize right of use assets and lease liabilities for short term leases of less than a term of 12 months and leases of low value. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the term of the lease.

(j) Investments

The Company's investments in private entities are classified as FVTPL and are carried at fair value. At initial recognition, investments in private entities are measured at cost, which is representative of fair value, and subsequently, at each reporting date, recorded at fair value with increases and decreases arising from changes in fair values including the impact of dividends and/or distributions being recorded in the consolidated statements of (loss) profit and comprehensive (loss) income for the period in which they arise. Transaction costs on the investments are expensed as incurred.

Investments in associates are initially recorded at cost and subsequently adjusted to recognize the Company's share of profit and other comprehensive income of the associates and any dividends and/or distributions received from the associates.

Investment in Arena Special Opportunities Fund, LP ("ASOF LP") (as defined in note 4), is classified as FVTPL and is carried at fair value.

Investments in financial assets and instruments that are not traded in an active market, including private entities, are generally valued initially at the cost of acquisition on the basis that such cost is a reasonable estimate of fair value. Such investments are subsequently revalued using accepted industry valuation techniques. The Company considers a variety of methods and makes assumptions that are based on market conditions existing at each period end date. Valuation techniques used may include initial acquisition cost, net asset value, discounted cash flow analysis, comparable recent arm's length transactions, comparable publicly traded company metrics, reference to other instruments that are substantially the same, option pricing models and other valuation techniques commonly used by market participants. Any sale, size or other liquidity restrictions on the investment are also considered by management in its determination of fair value. Due to the inherent uncertainty of valuation, management's estimated values may differ significantly from the values that would have been used had an active market for the investments existed, and the differences could be material.

The Company may use internally developed models, which are usually based on valuation methods and techniques generally recognized as accepted within the industry. Valuation models are used primarily to value unlisted equity and debt securities for which no market quotes exist or where markets were or have been inactive during the financial period. Some of the inputs to these models may not be observable and are therefore estimated based on assumptions. The output of a model is always an estimate or approximation of a value that cannot be determined with certainty, and valuation techniques employed may not fully reflect all factors relevant to the positions the Company holds. Valuations are therefore adjusted, where appropriate, to allow for additional factors including model risk, liquidity risk and counterparty risk.

Management is responsible for performing fair value measurements included in the Company's interim consolidated financial statements for each reporting period. The Company prepares a detailed valuation for each reporting period describing the valuation processes and procedures undertaken by management. The applicable valuation memoranda are provided to members of the Company's audit committee and all Level 3 valuation results are reviewed with the audit committee as part of its review of the Company's interim consolidated financial statements.

(k) Income taxes

Income tax expense is recognized in the consolidated statements of (loss) profit and comprehensive (loss) income. Current tax is based on taxable income in countries where the Company operates may differ from profit and comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible.

Deferred tax assets are generally recognized for all deductible temporary income tax differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets and liabilities are determined based on the enacted or substantively enacted tax laws and rates that are anticipated to apply in the year of realization. The measurement of deferred tax assets and liabilities reflects the tax consequences that would follow from the manner in which the Company expects to recover or settle the carrying amount of the related assets and liabilities. The carrying amount of the deferred tax asset is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Income tax assets and liabilities are offset when the Company intends to settle on a net basis and there is a legally enforceable right to do so.

2 Summary of Significant Accounting Policies (continued)

(l) Warrants

Warrants subject to a cashless exercise at the discretion of the holder are classified as a derivative liability and measured at FVTPL. Change in the fair value of the warrants is reported in the consolidated statements of (loss) profit and comprehensive (loss) income for the period in which they arise.

(m) Contributed surplus

When share capital of the Company is repurchased by the Company, the amount by which the cost to repurchase the shares exceeds the average carrying value of the shares is included in contributed surplus. The cost of stock options was recognized over the period from the issue date to the vesting date and recorded as contributed surplus.

(n) Accumulated other comprehensive loss

Accumulated other comprehensive loss consists of cumulative exchange differences from currency translation as a result of a change in presentation currency from C\$ to US\$ on August 31, 2015.

(o) Share-based compensation

The Company maintains share-based compensation plans, which are described in note 11. The value attributed to stock options at issuance are recognized in income as an expense over the period from the issue date to the vesting date with a corresponding increase in contributed surplus. Any consideration paid by stock option holders for the purchase of stock is credited to share capital.

Obligations related to Deferred Share Units ("DSUs") and Restricted Share Units ("RSUs") are recorded as liabilities at fair value. At each reporting date they are re-measured at fair value with reference to the fair value of the Company's stock price and the number of units that have vested. When a change in value occurs, it is recognized in share-based compensation expense (recovery) and foreign exchange gain (loss) in the applicable financial period.

(p) Earnings per share

Basic earnings per share is calculated by dividing profit by the weighted average number of Common Shares outstanding during the reporting period. See note 14 for the calculation of the weighted average number of Common Shares outstanding.

Diluted earnings per share is calculated by dividing profit by the weighted average number of shares outstanding during the reporting period after adjusting both amounts for the effects of all dilutive potential Common Shares, which consist of options, RSUs and warrants. Anti-dilutive potential Common Shares are not included in the calculation of diluted earnings per share.

Subsequent to initial recognition, the right of use asset is depreciated using the straight-line method over the term of the lease with depreciation recorded in the consolidated statements of (loss) profit and comprehensive (loss) income. The Company's investments in private entities are classified as FVTPL and are carried at fair value under investments in the consolidated statements of financial position. Changes in fair value are reported under "Net results of investments" in the consolidated statements of profit and comprehensive income.

The table below summarizes the fair value hierarchy under which the Company's investments in private entities are valued. Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities. Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs). Inputs are considered observable if they are developed using market data, such as publicly available information about actual events or transactions, and that reflect the assumption that market participants would use when pricing the asset or liability.

At December 31, 2021, the Company's \$192,011 valuation of its investment in Skyward Specialty consisted of the aggregate fair value of: (i) Skyward Specialty convertible preferred shares held directly by the Company of \$95,832, (ii) its share of the Skyward Specialty common shares held by the HIIG Partnership of \$95,785, and (iii) its share of the other net assets of the HIIG Partnership of \$394.

The convertible preferred shares of Skyward Specialty were acquired by Westaim on April 20, 2020 as Skyward Specialty completed a rights offering that resulted in total gross proceeds of \$100,000 to Skyward Specialty. As part of the rights offering, Westaim purchased \$44,004 of the Skyward Specialty convertible preferred shares offered. At December 31, 2021, the final conversion price was determined to be \$1.51 per share. At June 30, 2022, the Company's direct ownership of the Skyward Specialty preferred shares, which are convertible into Skyward Specialty common shares represented 21.9% (December 31, 2021 – 22.0%) of the fully diluted Skyward Specialty common shares outstanding.

At June 30, 2022, the Company owned approximately 62.0% (December 31, 2021 – 62.0%) of the HIIG Partnership and the HIIG Partnership held Skyward Specialty common shares representing approximately 35.3% (December 31, 2021 – 35.5%) of the total fully diluted Skyward Specialty common shares outstanding. The Company, through HIIG GP, has a management services agreement with Skyward Specialty, whereby HIIG GP is entitled to receive from Skyward Specialty an advisory fee of \$500 annually.

4 Investments (continued)

FVTPL

The investment in Skyward Specialty is accounted for at FVTPL. The fair value of the Company's investment in Skyward Specialty was determined to be \$186,975 at June 30, 2022 and \$192,011 at December 31, 2021.

Management used a multiple of net asset value as the primary valuation technique to arrive at the fair value of the Company's investment in Skyward Specialty at June 30, 2022. The fair value of the investment in Skyward Specialty at June 30, 2022 was derived from a valuation of the Skyward Specialty fully diluted common shares and other net assets held by the HIIG Partnership, and the Skyward Specialty convertible preferred shares held by Westaim at June 30, 2022. The carrying values of the HIIG Partnership's other net assets, consisting of monetary assets including cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, approximate their fair values due to the short maturity of these financial instruments. In valuing the Skyward Specialty fully diluted common shares, management determined that using net asset value as the primary valuation technique produced the best indicator of the fair value of the Skyward Specialty fully diluted common shares at June 30, 2022 and December 31, 2021, given that this is the valuation technique which a market participant would employ. The Skyward Specialty convertible preferred shares were valued at their common share equivalent on an as converted basis.

In valuing Skyward Specialty's fully diluted common shares, using a multiple of net asset value as the primary valuation technique, fair value was determined to be 1.0x the adjusted stockholders' equity of Skyward Specialty at June 30, 2022 (December 31, 2021 - 1.0x). The adjusted stockholders' equity of Skyward Specialty at June 30, 2022 reflects the Skyward Specialty stockholders' equity obtained from the unaudited financial statements of Skyward Specialty as at and for the six months ended June 30, 2022 prepared in accordance with accounting principles generally accepted in the United States of America, adjusted for a reclassification of a stock notes receivable from employees relating to their purchase of Skyward Specialty common and convertible preferred shares. The adjusted stockholders' equity contained certain significant judgments and estimates made by management of Skyward Specialty including the provision for loss and loss adjustment expenses ("LAE"), the valuation of goodwill and intangible assets, and the valuation allowance recorded against deferred income tax assets.

Management considers other secondary valuation methodologies as a way to ensure no significant contradictory evidence exists that would suggest an adjustment to the fair value as determined by the primary valuation methodology used. In order to do this, the Company may also consider valuation techniques including the discounted cash flow method, the review of comparable arm's length transactions involving other specialty insurance companies and comparable publicly traded company valuations. For greater certainty, these secondary valuation techniques were not used to arrive at the fair value of the Company's investment in Skyward Specialty at the end of each reporting period.

The Company recorded a decrease in the unrealized value on its investment in Skyward Specialty of \$3,947 and \$5,036 in the three and six months ended June 30, 2022, respectively, and an increase in the unrealized value on its investment in Skyward Specialty of \$4,971 and \$8,557 in the three and six months ended June 30, 2021, respectively.

For purposes of assessing the sensitivity of Skyward Specialty stockholders' equity on the valuation of the Company's investment in Skyward Specialty, if Skyward Specialty stockholders' equity at June 30, 2022 was higher by \$1,000, the fair value of the Company's investment in Skyward Specialty at June 30, 2022 would have increased by approximately \$437 (December 31, 2021 - \$440) and the change in the unrealized value of investments in private entities for the three and six months ended June 30, 2022 would have increased by approximately \$437 (for the three and six months ended June 30, 2021 - \$440). If Skyward Specialty stockholders' equity at June 30, 2022 was lower by \$1,000, an opposite effect would have resulted.

Investment in the Arena FINCOs

The Company owns a 100% interest in the Arena FINCOs and exercises control over the businesses of the Arena FINCOs.

FVTPL

The Company's investment in the Arena FINCOs is accounted for at FVTPL and are included in investments in private entities. The fair value of the Company's investment in the Arena FINCOs was determined to be \$174,152 at June 30, 2022 and \$172,866 at December 31, 2021.

Management used net asset value as the primary valuation technique and determined that 100% (or 1.0x) of the equity of the Arena FINCOs at June 30, 2022 in the amount of \$174,152 approximated the fair value of the Company's investment in the Arena FINCOs. Management determined that the net asset value valuation technique produced the best indicator of the fair value of the Arena FINCOs at June 30, 2022. This same valuation technique was used to determine the fair value of the Company's investment in the Arena FINCOs of \$172,866 at December 31, 2021.

4 Investments (continued)

The significant unobservable inputs used in the valuation of the Arena FINCOs at June 30, 2022 were the aggregate equity of the Arena FINCOs at June 30, 2022 and the multiple applied. Management applied a multiple of 1.0x as the equity of each of the entities reflected the net assets of the respective entity which were carried at fair value at June 30, 2022, as described below (December 31, 2021 – 1.0x). The equity contained certain significant judgments and estimates made by management of the Arena FINCOs, including the determination of the fair value of their subsidiaries' investments as noted below.

The carrying values of cash and cash equivalents, short-term investments, accounts receivable, senior secured notes payable, revolving credit facility payable, accounts payable and accrued liabilities of the Arena FINCOs approximate their fair values due to the short maturity of these financial instruments. The Arena FINCOs also make investments in equity securities, corporate bonds, private loans and other private investments, warrants and derivative instruments. When an investment is acquired or originated, its fair value is generally the value of the consideration paid or received. Subsequent to initial recognition, the Arena FINCOs determine the fair value of the investments using the following valuation techniques and inputs:

- Equity securities that are actively traded on a securities exchange are valued based on quoted prices from the applicable exchange. Equity securities traded on inactive markets and certain foreign equity securities are valued using significant other observable inputs, if available, which include broker quotes or evaluated price quotes received from pricing services. If the inputs are not observable or available on a timely basis, the values of these securities are determined using valuation methodologies for Level 3 investments described below.
- Corporate bonds are valued using various inputs and techniques, which include third-party pricing services, dealer quotations, and recently executed transactions in securities of the issuer or comparable issuers. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. Values for high-yield bonds are based primarily on pricing services and dealer quotations from relevant market makers. The dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds, and sector-specific trends. If these inputs are not observable or timely, the values of corporate bonds and convertible bonds are determined using valuation methodologies for Level 3 investments described below.
- Private loans and other private investments are valued using valuation methodologies for Level 3 investments. When valuing private loans, factors evaluated include the impact of changes in market yields, credit quality of the borrowers and estimated collateral values. If there is sufficient credit coverage, a yield analysis is performed by projecting cash flows for the instrument and discounting the cash flows to present value using a market-based, risk adjusted rate. On each valuation date, an analysis of market yields is also performed to determine if any adjustments to the fair values are necessary. Techniques used to value collateral, real estate, and other hard assets include discounted cash flows, with the discount rate being the primary unobservable input, recent transaction pricing and third-party appraisals. Private investments held through joint ventures are valued net of each respective joint venture waterfall and other joint venture assets and liabilities.
- Warrants that are actively traded on a securities exchange are valued based on quoted prices. Warrants that are traded over the counter or are privately issued are valued based on observable market inputs, if available. If these inputs are not observable or timely, the values of warrants are determined using valuation methodologies for Level 3 investments described below.
- Listed derivative instruments, such as listed options, that are actively traded on a national securities exchange are valued based on quoted prices from the applicable exchange. Derivative instruments that are not listed on an exchange are valued using pricing inputs observed from actively quoted markets. If the pricing inputs used are not observable and/or the market for the applicable derivative instruments is inactive, the values of the derivative instruments are determined using valuation methodologies for Level 3 investments described below.

Where pricing inputs are unobservable and there is little, if any, market activity for Level 3 investments, fair values are determined by management of the Arena FINCOs using valuation methodologies that consider a range of factors, including but not limited to the price at which the investment was acquired, the nature of the investment, local market conditions, trading values on public exchanges for comparable securities, current and projected operating performance and financing transactions subsequent to the acquisition of the investment. The inputs into the determination of fair value may require significant judgment by management of the Arena FINCOs. Due to the inherent uncertainty of these estimates, these values may differ materially from the values that would have been used had a ready market for these investments existed.

Management considers other secondary valuation methodologies as a way to ensure no significant contradictory evidence exists that would suggest an adjustment to the fair value as determined by the primary valuation methodology used. In order to do this, the Company may also consider valuation techniques including the review of comparable arm's length transactions involving other specialty finance companies and comparable publicly traded company valuations. For greater certainty, these secondary valuation techniques were not used to arrive at the fair values of the Company's investment in the Arena FINCOs at the end of each reporting period.

4 Investments (continued)

The Company recorded an increase in the unrealized value of its investment in the Arena FINCOs of \$3,734 and \$6,286 before dividends paid of \$2,500 and \$5,000 in the three and six months ended June 30, 2022, respectively, in the consolidated statements of (loss) profit and comprehensive (loss) income. For purposes of assessing the sensitivity of the equity of the Arena FINCOs on the valuation of the Company's investment in the Arena FINCOs, if the equity of the Arena FINCOs at June 30, 2022 was higher by \$1,000, the fair value of the Company's investment in the Arena FINCOs at June 30, 2022 would have increased by \$1,000 (December 31, 2021 - \$1,000) and the change in the unrealized value of the investments in private entities for the three and six months ended June 30, 2022 would have increased by \$1,000 (for the three and six months ended June 30, 2021 - \$1,000). If the equity of the Arena FINCOs at June 30, 2022 was lower by \$1,000, an opposite effect would have resulted.

BP LLC's initial profit sharing percentage is 49%, and under the Associate Agreements, BP LLC has the right to earn-in up to 75% equity ownership percentage in the associates and share up to 75% of the profit of the associates based on achieving certain assets under management ("AUM") and cash flow (measured by the margin of trailing twelve months earnings before interest, income taxes, depreciation and amortization to trailing twelve month revenues) thresholds in accordance with the Associate Agreements. The Company concluded that based on the contractual rights and obligations under the Associate Agreements, the Company does not exercise control but exercises significant influence over the associates. 6 Preferred Securities (continued)

The Preferred Securities are denominated in C\$, each issuable for a principal amount of C\$10 and carry interest at a rate of 5% per annum. The Preferred Securities are subordinate secured securities that will mature on May 26, 2116 but may be repaid, in whole or in part, by the Company at any time after June 2, 2022 and at any time after June 2, 2020 if the volume-weighted average trading price of the Common Shares for any 10 day period prior to the date on which the applicable redemption notice is given is at least C\$5.60.

On June 2, 2017, the Company closed the subscription by Fairfax of C\$50 million of Preferred Securities (the "Fairfax Financing"). The Company had discretion until January 1, 2018 to require Fairfax to purchase all or part of 5,000,000 additional Preferred Securities, and exercised its discretion not to do so. There were 5,000,000 Preferred Securities outstanding at June 30, 2022 and December 31, 2021.

The Preferred Securities are repayable on demand upon a change of control of Westaim and the liability is recorded at the principal amount in the consolidated statements of financial position. The Preferred Securities liability is translated into US\$ at rates of exchange at the end of each reporting period and any resulting foreign exchange gain or loss is included in the consolidated statements of (loss) profit and comprehensive (loss) income. The carrying amount of the Preferred Securities, which approximated fair value, was \$38,847 and \$39,554 at June 30, 2022 and December 31, 2021, respectively. The Company recorded an unrealized foreign exchange gain relating to the Preferred Securities of \$1,211 and \$707 in the three and six months ended June 30, 2022, respectively, and an unrealized foreign exchange loss relating to the Preferred Securities of \$510 and \$1,044 in the three and six months ended June 30, 2021, respectively.

7 C\$ Exchange Forward Contracts

At June 30, 2022, the Company has a 365 day C\$ exchange forward contract to purchase C\$50 million maturing on September 28, 2022. Additionally, during the year ended December 31, 2021, the Company settled three C\$ exchange forward contracts to purchase C\$40 million. The impact was to primarily offset C\$ currency gains or losses on the Company's underlying C\$ currency liabilities, including the currency exposure arising from the Preferred Securities.

The Company has not designated these C\$ exchange forward contracts as accounting hedges.

Changes to the C\$ exchange forward contract payable was as follows:

	June 30, 2022	December 31, 2021
C\$ exchange forward contract (payable) receivable, opening balance	\$ (443)	\$ (11)
Change in value of C\$ exchange forward contracts – gain (loss)	(707)	(426)
Net cash settlements received from C\$ exchange forward contracts	-	(6)
C\$ exchange forward contract receivable (payable), closing balance	\$ (1,150)	\$ (443)

A C\$ exchange forward contract payable was accrued in the amount of \$1,150 at June 30, 2022 and was recorded under accounts payable and accrued liabilities in the consolidated statements of financial position. At December 31, 2021, a C\$ exchange forward contract payable was accrued in the amount of \$443 and was recorded under accounts payable and accrued liabilities in the consolidated statements of financial position. 8 Derivative Warrant Liability

In connection with the Preferred Securities (see note 6), Westaim issued to Fairfax 14,285,715 Warrants, each exercisable for one Common Share at an exercise price of C\$3.50. The Warrants vest proportionately based upon the aggregate percentage of Preferred Securities purchased by Fairfax, with 14,285,715 having vested on June 2, 2017. Each vested Warrant was originally exercisable on or prior to June 2, 2022, but the expiry date automatically extended to June 2, 2024 since the volume-weighted average trading price of the Common Shares for the 10 day period ending on June 2, 2022 was less than C\$5.60. The Company can elect to require early exercise of the Warrants if the volume-weighted average trading price of the Common Shares for any 10 day period prior to the election is at least C\$5.60.

8 Derivative Warrant Liability (continued)

The Warrants are subject to a cashless exercise at the discretion of Fairfax and are classified as a derivative liability in accordance with IFRS and measured at FVTPL. The fair value of the vested Warrants at initial recognition was recorded as an expense in the consolidated statements of (loss) profit and comprehensive (loss) income. Subsequent changes in fair value of the vested Warrants are reported in the consolidated statements of (loss) profit and comprehensive (loss) income for the period in which they arise.

Changes to the derivative warrant liability are as follows:

	June 30, 2022	December 31, 2021
Opening balance	\$ 156	\$ 1,026
Change in fair value – (gain)	(64)	(884)
Unrealized foreign exchange – (gain) loss	(1)	14
Ending balance	\$ 91	\$ 156

The fair value liability of the vested Warrants at June 30, 2022 of \$91 (December 31, 2021 - \$156) was estimated using the Monte Carlo pricing model assuming no dividends are paid on the Common Shares, a risk-free interest rate of 2.81% (December 31, 2021 - 0.17%), an expiration date between July 1, 2022 and June 2, 2024 (December 31, 2021: January 1, 2022 and June 2, 2024), a volatility of the underlying Common Shares of 26.84% (December 31, 2021 - 26.50%), a closing price of the Common Shares of C\$2.42 (December 31, 2021 - C\$2.50) and a strike price of C\$3.50. The amounts computed according to the Monte Carlo pricing model may not be indicative of the actual values realized upon the exercise of the vested Warrants by Fairfax. A sensitivity analysis is performed within the Monte Carlo pricing model, which produces a probability distribution of possible outcomes by identifying which inputs impact the outcome the most.

The Company recorded an unrealized loss resulting from a change in the fair value of the vested Warrants of \$7 in the three months ended June 30, 2022, an unrealized gain of \$64 in the six months ended June 30, 2022, and an unrealized gain from a change in the fair value of the vested Warrants of \$427 and \$145 in the three and six months ended June 30, 2021, respectively. The Company also recorded an unrealized foreign exchange gain with respect to the vested Warrants of \$3 and \$1 in the three and six months ended June 30, 2022, respectively, and an unrealized foreign exchange loss with respect to the vested Warrants of \$17 and \$31 in the three and six months ended June 30, 2021, respectively, under foreign exchange (gain) loss in the consolidated statements of (loss) profit and comprehensive (loss) income.

11 Share-based Compensation (continued)

The Option Plan is a “rolling plan” which provides that the aggregate number of Common Shares which may be reserved for issuance under the Option Plan is limited to not more than 10% of the aggregate number of Common Shares outstanding or 14,138,671 at June 30, 2022 (December 31, 2021 – 14,268,671). However, each of the Incentive Plan and the Option Plan provide that under no circumstances shall there be Common Shares issuable under such plan, together with all other security-based compensation arrangements of Westaim, which exceed 10% of the aggregate number of Common Shares outstanding. As the DSUs are settled solely in cash, they are not included in such 10% limitation.

In certain circumstances such as a change of control of Westaim or the sale of substantially all of the assets of Westaim, all outstanding options and RSUs will vest immediately.

15 Capital Management

Westaim's capital currently consists of the Preferred Securities and Common Shares.

The Company's guiding principles for capital management are to maintain the stability and safety of the Company's capital for its stakeholders through an appropriate capital mix and a strong balance sheet.

The Company monitors the mix and adequacy of its capital on a continuous basis. The Company employs internal metrics. The capital of the Company is not subject to any restrictions. Units of the HIIG Partnership cannot be issued without the prior approval of the unitholders and, in connection with any such issuance, the holders of units have pre-emptive rights entitling them to purchase their pro rata share of any units that may be so issued.

16 Financial Risk Management

The Company is exposed to a number of risks due to its business operations. The Company's consolidated statement of financial position at June 30, 2022 consists of short-term financial assets and financial liabilities with maturities of less than one year, investments in private entities and associates, Preferred Securities, and derivative warrant liability. The most significant identified risks which arise from holding financial instruments include credit risk, liquidity risk, currency risk, interest rate risk and equity risk. The Company has a comprehensive risk management framework to monitor, evaluate and manage the risks assumed in conducting its business.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company's credit risk arises primarily from its cash and cash equivalents. The Company manages such risk by maintaining bank accounts with Schedule 1 banks in Canada and a major bank in the United States.

16 Financial Risk Management (continued)

Liquidity risk

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company has made investments in private entities and associates which do not typically have an active market. Private investment transactions can be highly structured and the Company takes measures, where possible, to create defined liquidity events and as part of its strategy, the Company has sought to create or accelerate such liquidity events. However, such liquidity events are rarely expected in the first two or three years of making an investment and may not be realized as expected.

At June 30, 2022, the Company's short-term financial liabilities amounted to \$3,831 (December 31, 2021 - \$4,673), and the Company has access to cash and other resources to meet these financial obligations.

Currency risk

The Company's C\$ denominated monetary liabilities exceed C\$ denominated monetary assets and most of its operating expenses are paid in C\$. From time to time, the Company may enter into C\$ to US\$ exchange forward contracts to manage its C\$ currency exposures. At June 30, 2022, the Company's C\$50 million (December 31, 2021 - C\$50 million) C\$ exchange forward contract is effective at reducing a significant portion of the risk associated with changes in the C\$ currency exchange. At June 30, 2022, it is estimated a 10% strengthening of the C\$ against the US\$ would have increased the foreign exchange loss by approximately \$696 and \$1,609 for the six months ended June 30, 2022 and 2021, respectively. A similar weakening of the C\$ would result in an opposite effect.

The Company has not designated any foreign exchange forward contracts as accounting hedges.

Interest rate risk

The Company does not believe that the results of operations or cash flows would be affected to any significant degree by a sudden change in market interest rates relative to interest rates on its cash and cash equivalents, loans receivable, or the Preferred Securities. The Company is subject to interest rate risks indirectly as a result of its investment in Skyward Specialty and the Arena FINCOs as certain underlying investments made by these entities are sensitive to interest rate movements.

Equity risk

There is no active market for the Company's investment in preferred shares of Skyward Specialty and investments in Skyward Specialty (through the HIIG Partnership) and the Arena FINCOs. The Company holds these investments for strategic and not trading purposes. The fair values of these investments recorded in the Company's interim consolidated financial statements have been arrived at using industry accepted valuation techniques. Due to the inherent uncertainty of valuation, these fair values may not be indicative of the actual values which can be realized upon a liquidity event for these investments.
